§
§
§
§
§
§

CRIMINAL NO. 6:16-56(S)-2

MEMORANDUM OPINION & ORDER

Pending before the Court is Defendant Veronica Jones Magallan's Motion for Compassionate Release Due to COVID-19. D.E 381.

I. BACKGROUND

In 2017, Defendant pled guilty to conspiracy to possess with intent to distribute more than 500 grams of methamphetamine and possession of a firearm in furtherance of a drug trafficking crime. She has served 43 months (29%) of her aggregate 150-month sentence and has a projected release date, after good time credit, of November 20, 2026. She now moves the Court for compassionate release because her underlying medical conditions make her particularly vulnerable to severe illness or death should she contract COVID-19 in prison.

II. LEGAL STANDARD

The statute, 18 U.S.C. § 3582(c)(1)(A), authorizes a court to reduce a defendant's sentence under limited circumstances:

(c) Modification of an Imposed Term of Imprisonment.—The court may not modify a term of imprisonment once it has been imposed except that—

(1) in any case—

(A) the court, upon motion of the Director of the Bureau of Prisons, or upon motion of the defendant after the defendant has fully exhausted all administrative rights to appeal a failure of the Bureau of Prisons to bring a motion on the defendant's behalf or the lapse of 30 days from the receipt of such a request by the warden of the defendant's facility, whichever is earlier, may reduce the term of imprisonment (and may

impose a term of probation or supervised release with or without conditions that does not exceed the unserved portion of the original term of imprisonment), after considering the factors set forth in section 3553(a) to the extent that they are applicable, if it finds that—

- (i) *extraordinary and compelling reasons warrant such a reduction . . .* and that such a reduction is consistent with applicable policy statements issued by the Sentencing Commission.

18 U.S.C. § 3582(c)(1)(A)(i) (emphasis added).

“Although not dispositive, the commentary to the United States Sentencing Guidelines (‘U.S.S.G.’) § 1B1.13 informs [the Court’s] analysis as to what reasons may be sufficiently ‘extraordinary and compelling’ to merit compassionate release.” *United States v. Thompson*, 984 F.3d 431, 433 (5th Cir. 2021) (citing *United States v. Rivas*, — Fed. App’x —, 2020 WL 6437288, at *2 (5th Cir. Nov. 2, 2020)).

(A) Medical Condition of the Defendant.—

(i) The defendant is suffering from a terminal illness (i.e., a serious and advanced illness with an end of life trajectory). A specific prognosis of life expectancy (i.e., a probability of death within a specific time period) is not required. Examples include metastatic solid-tumor cancer, amyotrophic lateral sclerosis (ALS), end-stage organ disease, and advanced dementia.

(ii) The defendant is—

- (I) suffering from a serious physical or medical condition,
- (II) suffering from a serious functional or cognitive impairment, or
- (III) experiencing deteriorating physical or mental health because of the aging process,

that substantially diminishes the ability of the defendant to provide self-care within the environment of a correctional facility and from which he or she is not expected to recover.

(B) Age of the Defendant.—

The defendant is (i) at least 65 years old; (ii) is experiencing a serious deterioration in physical or mental health because of the aging process; and (iii) has served at least 10 years or 75 percent of his or her term of imprisonment, whichever is less;

(C) Family Circumstances. –

- (i) The death or incapacitation of the caregiver of the defendant’s minor child or minor children.

(ii) The incapacitation of the defendant's spouse or registered partner when the defendant would be the only available caregiver for the spouse or registered partner.

(D) Other Reasons. –

As determined by the Director of the Bureau of Prisons, there exists in the defendant's case an extraordinary or compelling reason other than, or in combination with, the reasons described in subdivisions (A) through (C).

U.S.S.G. § 1B1.13(1)(A), Application Note 1.

Even if "extraordinary and compelling reasons" for early release exist, the Guidelines' policy statements provide for a reduction in sentence only if a defendant "is not a danger to the safety of any other person or the community, as provided in 18 U.S.C. §3142(g)." U.S.S.G. § 1B1.13(2). Factors relevant to this inquiry include: (1) the nature and circumstances of the offenses of conviction, including whether the offense is a crime of violence, or involves a minor victim, a controlled substance, or a firearm, explosive, or destructive device; (2) the weight of the evidence; (3) the defendant's history and characteristics; and (4) the nature and seriousness of the danger to any person or the community that would be posed by the defendant's release. *See* 18 U.S.C. § 3142(g).

The Court must also consider whether a reduction is consistent with the applicable section 3553(a) factors. *See* 18 U.S.C. § 3582(c)(1)(A); U.S.S.G. § 1B1.13. The applicable statutory factors include, among others: the defendant's history and characteristics; the nature and circumstances of the offense; the need for the sentence to reflect the seriousness of the offense, promote respect for the law, and provide just punishment for the offense; the need to deter criminal conduct and protect the public from further crimes of the defendant; the need to provide the defendant with, among other things, any needed medical treatment; and the various kinds of sentences available. *See* 18 U.S.C. §§ 3553(a)(1)-(7).

With respect to motions for compassionate release based on COVID-19:

A review of a motion for release based on COVID-19 is highly fact-intensive and dependent on the specific conditions of confinement and medical circumstances faced by the defendant. Hence, a prisoner cannot satisfy his burden of proof by simply citing to nationwide COVID-19 statistics, asserting generalized statements on conditions of confinement within the BOP, or making sweeping allegations about a prison's ability or lack thereof to contain an outbreak. . . . [T]he rampant spread of the coronavirus and the conditions of confinement in jail, alone, are not sufficient grounds to justify a finding of extraordinary and compelling circumstances. Rather, those circumstances are applicable to all inmates who are currently imprisoned and hence are not unique to any one person.

United States v. Koons, 2020 WL 1940570, at *4 & n.8 (W.D. La. Apr. 21, 2020) (citing *United States v. Raia*, 954 F.3d 594, 597 (3d Cir. 2020)).

To be sure, courts around the country, in some exceptional cases, have granted compassionate release where the defendant has demonstrated an increased risk of serious illness if he or she were to contract COVID. . . . But that is certainly not a unanimous approach to every high-risk inmate with preexisting conditions seeking compassionate release.

The courts that granted compassionate release on those bases largely have done so for defendants who had already served the lion's share of their sentences and presented multiple, severe, health concerns. . . . Fear of COVID doesn't automatically entitle a prisoner to release.

Thompson, 984 F.3d at 434–35 (collecting cases) (footnotes and citations omitted).

“In general, the defendant has the burden to show circumstances meeting the test for compassionate release.” *United States v. Stowe*, 2019 WL 4673725, at *2 (S.D. Tex. Sept. 25, 2019).

III. ANALYSIS

Defendant is 42 years old. She states that she suffers from hypertension, obesity, diabetes, and asthma; however, she has provided no medical records supporting her claim that she has any underlying medical condition that would make her particularly vulnerable to severe illness or death from COVID-19.¹

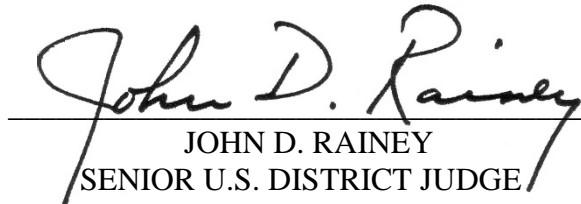

1. According to the Centers for Disease Control and Prevention (CDC), older adults (age 65 and above) and people of any age who have certain underlying medical conditions are at higher risk for severe illness from

Moreover, Defendant does not claim to have exhausted her administrative remedies within the BOP before filing the current motion. Because she has failed to comply with the exhaustion requirements under § 3582, her motion is not ripe for review, and the Court is without jurisdiction to grant it. *See generally, Ross v. Blake*, 136 S. Ct. 1850, 1856–57 (2016); *see also* *see also United States v. Reeves*, 2020 WL 1816496, at *2 (W.D. La. Apr. 9, 2020) (“While the Court is well aware of the effects the Covid-19 pandemic . . . , § 3582(c)(1)(A) does not provide this Court with the equitable authority to excuse Reeves’ failure to exhaust his administrative remedies or to waive the 30-day waiting period.”); *United States v. Clark*, 2020 WL 1557397, at *3 (M.D. La. Apr. 1, 2020) (denying motion for compassionate release based on fears of contracting COVID-19 in prison where defendant conceded he had not exhausted administrative remedies).

IV. CONCLUSION

For the foregoing reasons, Defendant’s Motion for Compassionate Release Due to COVID-19 (D.E. 381) is **DENIED**.

It is so **ORDERED** this 1st day of February, 2021.

JOHN D. RAINY
SENIOR U.S. DISTRICT JUDGE

COVID-19. *People with Certain Medical Conditions*, CDC (Dec. 29, 2020), <https://www.cdc.gov/coronavirus/2019-ncov/need-extra-precautions/people-with-medical-conditions.html>. People of any age with the following conditions are at increased risk of severe illness from COVID-19: Cancer, Chronic kidney disease; COPD (chronic obstructive pulmonary disease); Down Syndrome; Heart conditions, such as heart failure, coronary artery disease, or cardiomyopathies; Immunocompromised state from solid organ transplant; Obesity; Pregnancy; Severe Obesity; Serious heart conditions, such as heart failure, coronary artery disease, or cardiomyopathies; Sickle cell disease; Smoking; and Type 2 diabetes mellitus. People with the following conditions might be at an increased risk for severe illness from COVID-19: Asthma (moderate-to-severe); Cerebrovascular disease; Cystic fibrosis; Hypertension; Immunocompromised state from blood or bone marrow transplant, immune deficiencies, HIV, use of corticosteroids, or use of other immune weakening medicines; Neurologic conditions, such as dementia; Liver disease; Overweight; Pulmonary fibrosis; Thalassemia; and Type 1 diabetes mellitus.
